DETAILED ACTION

Claim Objections

1. Claims 1-9 and 12-16 are objected to because of the following informalities:

Claim 1, line 8: "an initial dynamic acquisition search window is" should be "an initial dynamic acquisition search window starting at W_{0s} and ending at W_{es} is".

Claims 2 & 12, line 2: "an initial start W_{0s} and an initial end W_{es} " should be "the initial start W_{0s} and the initial end W_{es} ".

Since the dynamic acquisition search window has different initial starts and ends, every time when the acquisition search requests step is performed, however. The equation of this claim depends on specific the initial start W_{0s} and the initial end W_{es} of the initial dynamic acquisition search window recited in claim1.

Claim 13, lines 5-6: "an initial dynamic acquisition search window is" should be "an initial dynamic acquisition search window starting at W_{0s} and ending at W_{es} is".

Claim 14, line 2: "an initial start W_{0s} and an initial end W_{es} " should be "the initial start W_{0s} and the initial end W_{es} ".

Claims 3-9, 15 and 16 are dependent on the objected claims 1 and 13 respectively.

Appropriate correction is required.

Allowable Subject Matter

2. Claims 10 and 11 are allowed.

Art Unit: 2611

3. Claims 1-9 and 12-16 would be allowable if rewritten to overcome the objection(s) set forth in this Office action.
4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or suggest, alone or in a combination, among other things, at least a method for detecting a multipath component of packet data at a receiver as a whole, the combination of elements and features, which includes the defining a dynamic acquisition search window having a time width increasing in proportion to a time duration of the inactive period, and the width and location of an initial dynamic acquisition search window starting at W_{0s} and ending at W_{es} based on a standard search window used before a mobile terminal enters the inactive period as recited in the claims.

Conclusion

5. This application is in condition for allowance except for the following formal matters: as listed in the objection section of this Office action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Art Unit: 2611
